(54) SYSTEM AND METHOD FOR PROVIDING INFORMATION, STORAGE MEDIUM, AND
COMPUTER PROGRAM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide delivery/distribution service by dynamically integrating advertisement information regarding respective products which are moved by arrangement, replacement, and withdrawal in a specified space in a store, etc.

SOLUTION: The product information regarding products in the store or specified range in the store is gathered and update at one place to automatically update the advertisement information in response to the movement of products such as arrangement, replacement, and withdrawal. A user is able to obtain the advertisement information consisting of a plurality of pieces of product information at a time. For example, a wide-range communication system is applied and then the user can browse the advertisement information from a distant place. Further, advertisement information on not a specified product, but products displayed in the store can automatically be obtained.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
